

To Our Clients and Partners:

As Coronavirus, COVID-19, has become an evolving and uncertain public health issue, Code Red Consultants continues look to federal and state authorities for guidance on how to navigate this developing situation as the health and safety of our staff, clients, project partners, and the community remains a top priority.

Given the concerns about the spread of COVID-19 and the associated impacts to our geographic region, all staff have been encouraged to work remotely through at least Friday April 3rd. Our office will be temporarily closed during this time, however our dial by name directory remains available @617-500-7633 with office phones being forwarded to mobile devices. Our general delivery voicemail box will be responded to immediately during normal business hours, 8a-5pm EST.

The team here at Code Red remains committed to maintain and deliver the same level of service and responsiveness to our clients, while employing alternate ways to collaborate and communicate to employ safe health practices. We are eliminating any non-essential in-person meetings and site visits but are leveraging the use of technology such as Microsoft Teams, Blue Beam Technology for design / drawings reviews and electronic sealing. Our entire staff is setup to have access to our network remotely, which includes access to all files and software packages to deliver services to meet client needs including, AutoCAD, Revit as well as Procore, photos, video, or face time for certain types of site related inspections.

In addition, Code Red Consultants is committed to providing value added life safety services and are actively engaging our client base that have unique needs brought up on by this situation. If you are a healthcare client delivering healthcare services, we are prepared to prioritize services to meet your needs and provide creative solutions to the challenges of delivering patient care during this time. For construction sites which are faced with the challenges of temporarily closing and creating a secure and safe environment, we are available for consultation on the implementation of construction site safety protocols in accordance with NFPA 241.

Please don't hesitate to reach out with any questions or concerns. Thank you all for your trust in our team, and we wish you and your families the best.

Stay healthy and be safe!
